

SimpleFi SAP Analytics Cloud Win Story: HSC

Technology manufacturing company selects SimpleFi's prepackaged financial reporting content and SAP Analytics Cloud to meet their requirements

Industry: Semiconductor
Manufacturing
Revenue: \$500M+
Location: Michigan
Project Duration: 4 weeks

Requirements:

- Financial Statements including P&L, Balance Sheet
- KPIs including EBITDA, Gross Margin, Cost of Goods Sold, ROI, Variable Expenses
- Mobile-enabled dashboards

Background

HSC approached SimpleFi looking for a financial reporting solution with SAP Analytics Cloud to provide easy connectivity to SAP transactional data and easy to access dashboards for their executive team. The company was looking for a solution that could be deployed quickly to drive value with SAP Analytics Cloud. SimpleFi demonstrated their pre-packaged financial reporting content and dashboarding capabilities to HSC and they determined this content could be leveraged to meet their requirements in the quick timeframe we were given with low configuration. In addition, SimpleFi shared example calculations to help bring analytical reporting online for HSC.

Project Approach

- SimpleFi standard Financial reporting and dashboard content will be the foundation for Financial reporting stories and visualizations

SimpleFi Prepackaged Content

- Financial Reporting

Solution Value to HSC

- Leverage SimpleFi content to replace Excel and Powerpoint; automate manual reporting processes
- Decrease time and cost to deploy by 30-50% with SimpleFi content
