

SimpleFi SAP Analytics Cloud Win Announcement : BPC, Power BI Replacement

Building Materials
Company

Company Background

- Headquartered:
Chicago
- Company size:
Midmarket

Background

A leading building materials company located in the U.S., approached SimpleFi to help evaluate replacement of their existing BPC solution for planning and consolidated segment reporting, in addition to the replacement of Power BI.

Project Objectives

The project goal is to build a reporting and planning solution positioned to replace BPC and Power BI which can expand within the U.S. company and then potentially expand to their European parent company.

Project Scope

- Sales and product reporting
- Segment P&L reporting and consolidations
- P&L mappings

Project Benefits:

- One solution for financial reporting, consolidated segment reporting, profitability, and analytics
- Modernize planning and reporting solutions
- Retire legacy software and technology which is no longer strategic

Deal Participants

SimpleFi Client Partner: Dan Skiendziel
SimpleFi Sales Lead: Jon Essig
