

SimpleFi Solutions, LLC - SAP Analytics Cloud for Planning Win Story

A. Stucki Company – Financial Reporting Platform

Company Background

- Headquartered: Moon Township PA
- Industry: Manufacturing - Railcar
- Company size: Mid-Market

Background

A. Stucki Company selected SimpleFi Solutions to build their enterprise financial reporting application. Their financial reporting platform will integrate with their SAP & Non-SAP data/landscapes.

Project Objectives

A. Stucki Company will build their solution using SAP Analytics Cloud to promote consistent data entry and reporting, provide a consolidated view, compare versions, and compare scenarios.

Project Goal

Develop an integrated and efficient financial reporting platform for the enterprise while also having the ability to deploy planning capabilities in the future on a single technology platform (SAP Analytics Cloud).

Project Benefits

Increased accuracy, efficiency, and modernization of A. Stucki Company by replacing Microsoft Excel with SAC-P. By leveraging SimpleFi Solutions' pre-built content, A. Stucki was able to significantly reduce the total cost of ownership while accelerating their deployment.

Leveraging SimpleFi Solutions gave A. Stucki the ability to quickly select and compare SAP Analytics Cloud to their existing planning solution and other competing planning solutions. SimpleFi Solutions was able to provide a thorough demo of SAC while running the entire sale cycle for SAP.
